

AMERICAN COMPOSITES MANUFACTURERS ASSOCIATION

ACMA 2Q24 Pulse of the Industry Survey

Release: March 29, 2024 Compiled by Vault Consulting, LLC

The information contained in the following reports is considered confidential, and its use is intended exclusively for ACMA Members. Recipients of this information should not reproduce, cite publicly, or distribute report contents in any form to outside sources without obtaining prior written consent from ACMA.

Summary of Key Findings

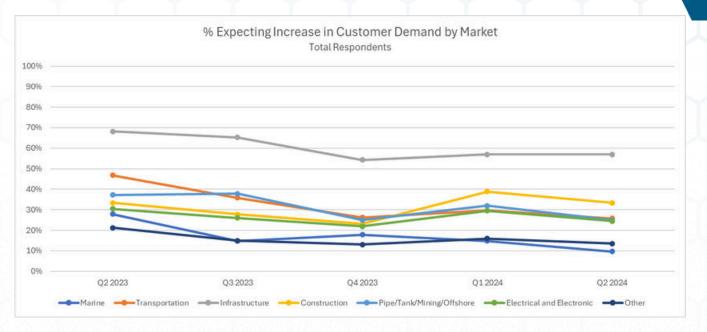

SUMMARY OF KEY FINDINGS:

This quarter, an Executive Summary has been added showing trends on key measures. Highlights include:

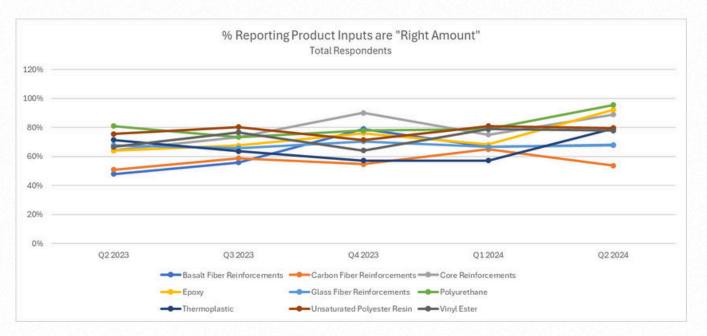

- Expected increases in customer demand quarter over quarter have been fairly stable over the past year, except in 4Q23 when all segments dipped except in the Marine market.
- For the past year, respondents consistently indicate the highest anticipated increases in the Infrastructure market although after the dip in 4Q23 perceived increases have generally leveled off though 2Q24.
- A majority of respondents report that Product Inputs are at the "right amount" for the past year. However, the percent indicating this for Thermoplastics had been declining through the first quarter of 2024 but jumped back up in 2Q.
- A majority have seen inventory levels as "stable" for the past year. While this fluctuated a bit for many product inputs over the year, none have dipped below 50%.
- The importance of Hiring and Training and Supply Chain Disruption has receded a bit among total respondents since 3Q23 while the Regulation of Sytrene has increased. Roughly half of respondents indicate Sustainability and Recycing as important, which has been stable over the past year.
- Just under 40% of total respondents indicate current inventory levels for glass fiber reinforcements is high this quarter.

> 6 in 10 respondents do not feel Hydrogen is an important issue at this time.

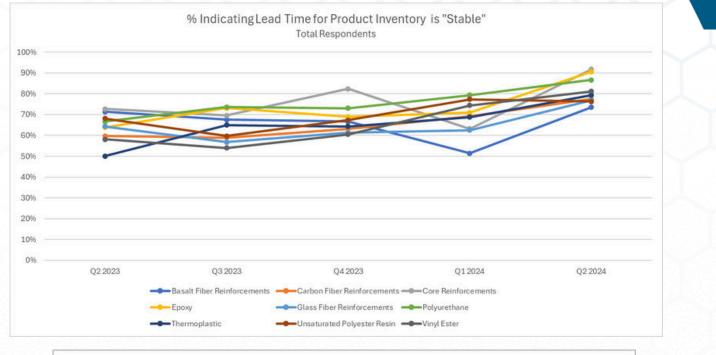

What is the outlook for customer demand in North America in the current quarter compared to the prior quarter for the following markets? Please only answer for markets for which you have knowledge.

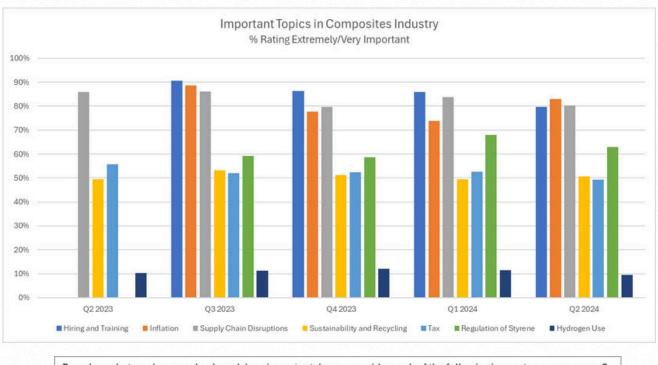

Using a scale of 1 to 5 where "1" means extremely low inventory, "3" means the right amount, and "5" means extremely high inventory, how do you view inventory for the following inputs? Please only answer on products for which you have knowledge.

What is the current lead time for the following inputs? Please only answer for products for which you have knowledge.

Based on what you have read or heard, how important do you consider each of the following issues to your company?

OUTLOOK FOR CUSTOMER DEMAND IN Q2 2024 COMPARED WITH Q1 2024

Survey Question: Using a scale of 1 to 5 where "1" means extremely low inventory, "3" means the right amount, and "5" means extremely high inventory, how do you view inventory for the following inputs? Please only answer on products for which you have knowledge.

*Darker shading represents the higher responses by market segment. Shading does not represent statistical significance.

Industry Topics of Interest

Top Two Topics of Interest				
Торіс	Percent Very or Extremely Important			
Inflation	20.40%			
Supply Chain Disruptions	19.83%			
~ ~ ~ ~ ~				

*Top Two Topics calculated as the highest percentage of very or extremely important topics out of all very or extremely important responses.

Based on what you have seen or heard, how important do you consider each of the issues to your company? If other, please specify

Background:

Purpose:

The purpose of the survey is to gauge perceptions about how the composites industry is performing over time. Published data from the survey will allow members to assess how their company's markets and inputs are trending relative to the overall composites industry; and enable ACMA to identify hot topics in the composites industry for which the association should be engaged on behalf of its members.

ACMA will also use the survey to gauge the perceived value of association membership and identify any strengths and areas for improvement.

Survey Objectives:

To assess perceptions of end market segments over the next quarter and next 9 months To determine the size of composites inputs inventory To identify issues that members perceive to be important in the composites industry

Survey Methodology:

The survey is conducted on a guarterly basis among members of ACMA.

The survey takes approximately **<u>5 minutes</u>** to complete and remain in the field for roughly two weeks.

Vault Consulting will distribute the survey each quarter and will be responsible for collecting, aggregating, and reporting results each quarter. Reports will be published roughly two weeks after fieldwork closes.

Sample sizes for the current quarter were as follows:

Total Respondents 88 Manufacturers 55 Supplier/Distributor 27 Affliliates 6

Data collection was conducted between 3/1/2024 to 3/15/2024.

For more information on this survey or how to participate please contact Paige Patterson at ppatterson@acmanet.org
