

AUTOMOTIVE COMPOSITES ALLIANCE

The mission of the Automotive Composites Alliance (ACA) is to serve as the composites industry's source of expert information for automotive, truck, bus, and rail industries to OEM's and the media by representing composites manufacturers and material suppliers who actively promote the benefits and use of composites for these industries.

Activities and Achievements:

- **Conducted** and supported two (2) ACMA Automotive Composites Technology Day events in 2023 with Hyundai-Kia and GM featuring exhibits and parts displays, private technology presentations in a curated technical program along with direct engagement with the OEM engineering community creating a forum for business opportunities for ACMA members.
- **Engaged** with major automotive OEMs including Honda, Ford, GM, Hyundai-Kia, and VW to present composites technology innovation and advancements providing composites solutions to the automotive OEM needs.
- **Supported** ACMA's Climate Impact Reduction through Composites Lifecycle Evaluation (CIRCLE) program to proactively address sustainability needs and demands of the automotive composites industry with the performance of composites.
- **Learned** about industry market opportunities and trends and other critical business information on the automotive industry to help make better decisions on where to allocate company resources based on the information and market data provided by S&P Global.
- **Collaborated** on and contributed to the development of an automotive composites technology roadmap on R&D investments needed to grow the automotive market.
- **Participated** in ACMA Composites Fly-In's on Capitol Hill to educate Congressional legislators on important applications technology using composites in automotive part manufacturing.

Current and Future Projects:

- **Education:** Plan and execute several ACMA Automotive Composites Technology Days at major automotive OEMs including Toyota, Rivian. Educate OEM executives, engineers, specifiers, and government officials, on advancements in composites technologies including materials and processes to demonstrate composites use and sustainability benefits.
- **Outreach:** Engagement with automotive OEMs to learn their critical needs and manufacturing objectives to implement composites technology.
- **Advocacy:** Educating Congressional Legislators on Capitol Hill on the impact and use of composites in automotive.
